

# LOWEST COST RE-ROOFING 95% OF THE TIME

Spray-applied polyurethane foam beat the price of all other options on 95% of BASF Polyurethane Foam Enterprises re-roofing projects. Why? Because it installed directly onto existing substrate: zero tear-off, zero landfill fees and zero downtime. Much lower maintenance and repair costs and greater energy efficiency add up to even more savings for the lowest lifecycle cost in low-slope roofing.

SPF roofing offers the lowest lifecycle cost. Get proof at [www.basf.com/proof](http://www.basf.com/proof) or call 1-888-900-FOAM
