#550 EZ-SEAL EMERGENCY LEAK STOPPER

California Proposition 65 Warning: This product may contain chemicals known to the State of California to cause cancer, birth defects and/or reproductive harm.

#550 SPECIFICATION

PRODUCT DESCRIPTION

Lucas #550 is a fast and effective product for temporarily stopping leaks in all types of low-slope roofs. Manufactured from gel forming bentonite clay, #550 forms a watertight barrier when exposed to water. Ideal for stopping leaks during rainstorms, in ponding areas or in winter when there is snow on the roof. Formed into free-flowing micro-pellets, Lucas #550 pours easily from the spout on its' reusable waterproof plastic container. The small pellet size exposes a greater surface area resulting in a faster gel and water stopping seal.

APPLICATION

Remove the cap from the lid of the pail and pull the spout to extend it fully prior to unscrewing the cap. To seal a leak, pour the #550 over the suspected leak area 1/2 to 1 inch thick. When using as a barrier, pour in a circle around the area to be repaired as needed to block the flow of water. Remove water from inside of the circle with a wet-vac. Dry the surface and repair as necessary. #550 may also be used as a night seal. Pour onto the exposed edge of the roof to prevent moisture entry from heavy dew or unexpected rain. Sweep off and resume work when desired.
