### Total Protection System for Metal Roof Restoration

When it comes to saving your old rusted metal roof, the Lucas **Total Protection System** gives you the complete package. Combined with years of experience, our products are designed to maximize the restoration process. Once complete, your roof will be restored to better than original condition and last for years to come.

R. M. Lucas Co. offers a full line of coatings and mastics for the professional roofing contractor. We offer everything from time-proven high quality bituminous coatings and mastics to technologically advanced polymer based reflective elastomeric coatings.

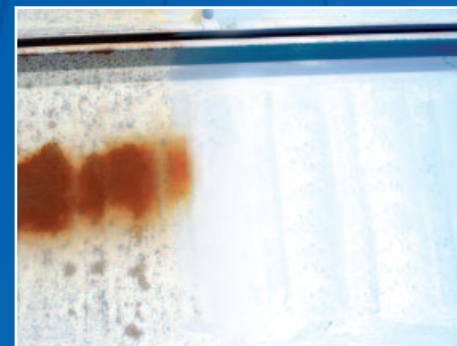

#### 1 Lucas 5500

The existing roof is prepared with all seams and fasteners sealed with Lucas 5500 Seam Sealer. Not only will this create better than original tightness, it is now ready for the Lucas 5100 base coat application.

#### 2 Lucas 5100

For maximum protection, the Lucas 5100 Metal Roof Base Coating, solvent-borne polymeric base coating is essential to the Total Protection System. It creates a rust inhibiting barrier between bare metal and the Lucas 5000 for ultra-low moisture permeability.

#### 3 Lucas 5000

Advanced Polymer Technology of the Lucas 5000, Solvent-based Elastomeric Coating provides superior moisture resistance. Lucas 5000 offers much lower water vapor transition than water-based elastomeric coatings preventing the rust from returning to your roof.

## Triple Protection Restoration

for Metal Roofing

- Save Up To 15% on your energy costs!
- Save Money with the Total Protection Restoration package.
- Save Your Roof! Add life to your investment and avoid even more costly repairs!

#### 1 Lucas 5500 Superior Elasticity Seam Sealer
