## #8000 100% SILICONE ROOF COATING\*

**Protect your roof with Lucas #8000 — our 100% silicone roof coating is built to last.** Lucas #8000 forms a seamless, waterproof layer that stands up to extreme environmental conditions including intense UV rays, severe weather, and thermal shock — keeping your building protected year-round. It's tough, flexible, and breathable, helping extend the life of your roof.

Why choose a silicone roof coating?

- Long-lasting protection: Silicone resists UV rays, ponding water, and extreme weather conditions.
- Lower energy costs: The reflective white finish helps reduce roof temperatures and cooling expenses.
- True sustainability: With regular maintenance silicone roofs eliminate the need to replace the existing roof assemblies. Simply recoat with Lucas #8000!

This coating works on many common roof types, including foam, TPO, rubber (EPDM), PVC, concrete, asphalt, modified bitumen, and metal roofs.

## #8400 SILICONE ROOF COATING Low Solids\*

**Durable, waterproof, and built to last.** Lucas #8400 is a solvent based, low solids 100% silicone roof coating. It forms a seamless, watertight barrier that protects your roof from the daily wear and tear of exposure to the elements.

Why choose Lucas #8400?

- Reliable protection: Resists UV rays, ponding water, and temperature changes.
- Versatile use: Works on most common commercial roofing substrates.
- Long-term performance: True sustainability (same as Lucas #8000).

## #8500 100% SILICONE MASTIC\*

**Seal and repair with lasting strength.** Lucas #8500 Silicone Mastic is a high-performance mastic grade silicone made for roof repairs, sealing seams, fasteners, penetrations, and other details prior to applying silicone roof coatings. Lucas #8500 adheres to a wide range of surfaces.

Benefits:

- Strong and flexible: Won't crack, shrink, or pull away over time.
- Safe and clean: Low odor, solvent-free, and non-corrosive.
- Multi-surface performance: Adheres to most common commercial roof coating substrates.

## #8900 100% SILICONE SKYLIGHT COATING

**Restore and protect your skylights.** Lucas #8900 is a clear, 100% silicone coating designed to seal and rejuvenate aged fiberglass skylight panels. It restores clarity while protecting against weathering and leaks.

Benefits:

- Clear finish: Keeps natural light flowing through your skylights.
- Durable protection: Resists UV rays, moisture, and temperature changes.
- Safe on metals: Neutral cure formula won't corrode surfaces.

Available Sizes Available Colors

\* Primer may be needed.

## #1000 ELASTOMERIC ROOF COATING

**Flexible and energy efficient.** Lucas #1000TC is a 100% acrylic elastomeric coating that provides a seamless, water tight, reflective finish for most common commercial roofs. Its rubber-like elasticity helps it flex with temperature changes and building movement.

### Benefits:

- Weather resistant: Protects against UV rays and leaks.
- Energy-saving: White reflective surface helps lower roof and building temperatures.
- Low odor making it safe for building occupants.

\*Keep from freezing.\*

## #1044 SUNSCREEN™ WHITE ELASTOMERIC ROOF COATING

**Affordable, reflective energy-saving protection!** Lucas #1044 SunScreen™ is a bright white acrylic roof coating designed to reflect sunlight, cool your building, and reduce energy costs.

### Benefits:

- Reflects heat: Lowers roof temperature and cooling bills.
- Cost-effective: Great performance at an affordable price.
- Versatile use: Ideal for most common commercial roof types.

Protects and brightens your roof while extending its life.

## #1500 ACRYLIC MASTIC

**Lucas #1500** is a durable acrylic mastic used to seal seams, fasteners, penetrations, and other details prior to applying acrylic coatings. It can also be used as a repair product over most positively sloped commercial roofs.

### Benefits:

- Elastic protection: Expands and contracts with roof movement.
- UV stable: Resists sunlight and weathering.
- Easy to use: Ideal for most common commercial roof types with positive slope.

## #6000 UNIVERSAL THERMOPLASTIC ROOF COATING

**Lucas #6000 Universal™ Roof Coating** is ideal for restoring and protecting rusted and non-rusted metal roofs. It can also be used to protect and waterproof TPO, Hypalon®, and asphalt.

### Benefits:

- All-weather protection.
- Superior elongation and tensile strength.
- Rust inhibiting formulation eliminating the need for a rust primer.

Not recommended for PVC or EPDM roofs.

## #6500 REPAIR SHIELD SEBS Wet/Dry Mastic Low Voc

**Strong, flexible repair solution for any surface and any weather. Lucas #6500 Repair Shield's advanced formulation is designed for tough roof repairs — even underwater. It bonds tightly and stays flexible to handle movement and extreme weather.**

### Benefits:

- All-weather use: Works on wet, dry, and even underwater surfaces.
- High strength: Resists cracking, peeling, and sagging.
- Safe and compliant: VOC compliant in all 50 states. PFAS and HAP free.

Ideal for repairing all common roof substrates.

## #5500 SEAM SEALER

**Seal roof seams and fasteners with confidence. Lucas #5500 is a premium rubber-based sealant designed for sealing seams, flashings, and fasteners on metal and many low-slope roofs.**

### Benefits:

- Tough and flexible: Stays adhered through extreme expansion and contraction.
- Versatile: Works on metal, asphalt, and many single-ply systems.
- Long-lasting: UV stable and extremely flexible.

Available in two grades: #5500G (Gun Grade) for spray applications, and #5500M (Mastic) for brush, roll, or trowel use.

## #776 ELITE™ FLASHING CEMENT

**The ultimate flashing cement for any condition.** Lucas #776 Elite™ is a top-tier, high-performance flashing cement made for roofing professionals who demand long-lasting, premium results. It delivers unmatched adhesion — even on wet or underwater surfaces — and stays flexible through temperature changes.

Why choose Lucas #776 Elite™?

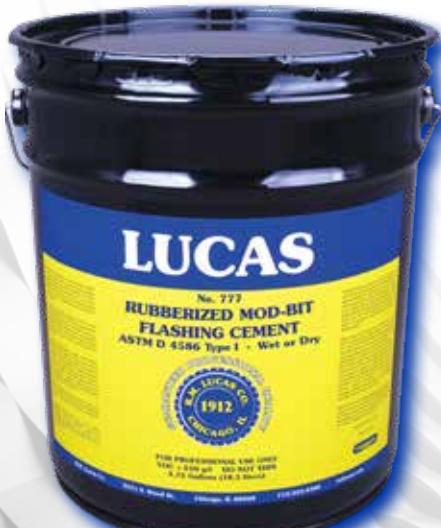

- All-weather performance: Bonds to wet, dry, or submerged surfaces.
- Superior flexibility: Polymer-modified to move with your roof and prevent cracking.
- Extreme durability: Reinforced with microfibers for added strength and a smooth finish.

Perfect for repairing or installing flashings on modified bitumen and asphalt roofs.

**WET OR DRY  
GUARANTEED**

### Available Sizes

## #777 RUBBERIZED MOD-BIT FLASHING CEMENT — WET OR DRY

**Premium, flexible flashing cement for easy repairs.** Lucas #777 is a rubberized, high-performance flashing cement that applies smoothly and holds strong — even in wet conditions. It's ideal for repairing flashings, seams, and roof penetrations on asphalt and modified bitumen systems.

### Benefits:

- Works wet or dry: Adheres securely in challenging conditions.
- Flexible & tough: SBS polymers provide long-lasting elasticity.
- Easy application: Spreads smoothly and cleanly for fast repairs.

Use with polyester fabric reinforcement for permanent repairs or in high-movement roof areas.

### Available Sizes

3 gal. pails	5 gal. pails
✓	✓

## #771 FLASHING CEMENT — PREMIUM

**Reliable, professional-grade flashing cement.** Lucas #771 is a premium trowel-grade flashing cement for installing and repairing flashings, seams, and penetrations on asphalt and built-up roofs. It spreads smoothly, sets quickly, and stays durable for years.

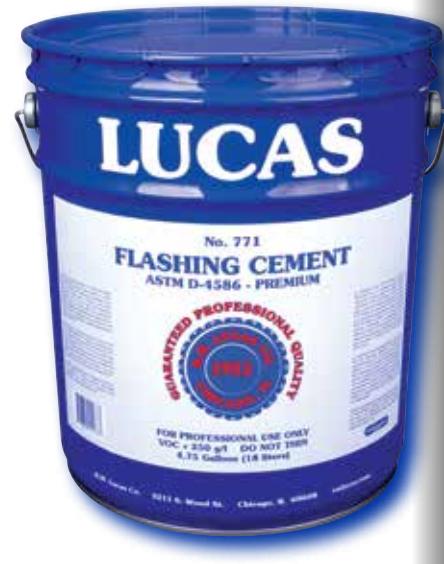

### Benefits:

- Professional quality: Made from refined asphalt — no cheap fillers.
- Smooth application: Breaks cleanly off the trowel with no stringing.
- Versatile use: Great for general flashing repairs and reinforcement.

For wet or modified bitumen applications, use Lucas #776 Elite™ for best results.

### Available Sizes

## #775 ALL-WEATHER ROOF CEMENT

**Dependable performance in any weather.** Lucas #775 is designed for roof and flashing repairs that can't wait for dry weather. It adheres tightly to wet or underwater surfaces and provides lasting protection.

### Benefits:

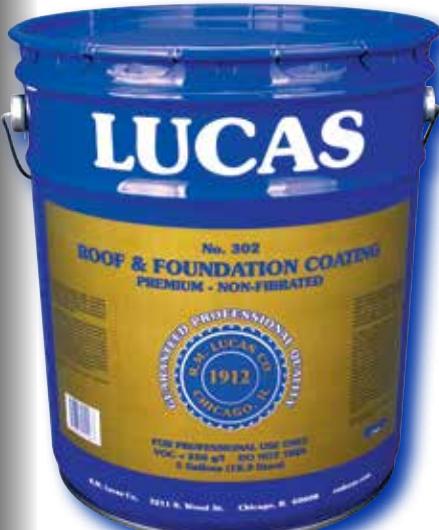

- All-weather formula: Ideal for emergency or year-round repairs.
- Easy to use: Smooth, non-stringing consistency.
- Durable repairs: Works with fabric reinforcement for permanent fixes.

Perfect for asphalt, built-up, and modified bitumen roofs.

## #302 ROOF COATING — PREMIUM

**Extend the life of your roof with a smooth, protective finish. Lucas #302** is a premium asphalt roof coating that helps restore and preserve smooth-surface built-up roofs. It forms a fast-setting protective layer that resists weathering and extends service life.

### Benefits:

- Cost-effective protection: Prolongs the life of existing asphalt roofs.
- Fast-setting: Allows for quicker return to service.
- Easy to apply: Ready-to-use formula with excellent brushing qualities.

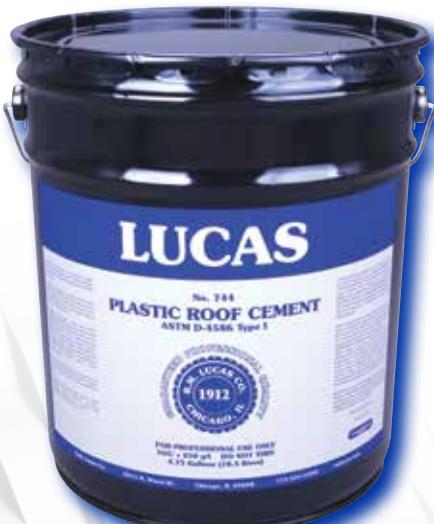

Not for use over tar or gravel-surfaced roofs.

## #744 PLASTIC CEMENT

**Strong, easy-to-use roof repair cement.** Lucas #744 Plastic Cement is a reliable, trowel-grade mastic for installing or repairing flashings, seams, and penetrations on asphalt and built-up roofs.

### Benefits:

- Durable and flexible: Stays strong through weather and temperature changes.
- Smooth application: Easy to spread and clean off the trowel.
- Versatile use: Works with fiberglass or polyester fabrics for lasting repairs.

Ideal for general roof maintenance and patching.

## #637 ELASTOMERIC 3 LB. FIBRATED ALUMINUM — SBS MODIFIED

**Reflective, flexible, and long-lasting protection.** Lucas #637 combines advanced SBS polymer technology with reflective aluminum pigments to create a coating that flexes with your roof while keeping it cool and protected.

### Benefits:

- Energy efficient: Reflective aluminum reduces heat and cooling costs.
- Flexible protection: Rubber-like elasticity adapts to building movement.
- Superior moisture resistance: Outperforms standard aluminum coatings, even in ponding areas.

Great for asphalt, metal, and modified bitumen roofs — especially SBS systems where it bonds molecularly with the membrane.

## #608 ALUMINUM COATING 2 LB. NON-FIBRATED

**Bright, reflective coating for lasting roof protection.** Lucas #608 provides a clean, reflective finish for metal buildings, mobile homes, and asphalt roofs. It helps lower roof temperatures and extends roof life.

### Benefits:

- Reflective finish: Keeps roofs cooler and reduces heat stress.
- Economical coverage: Light brushing viscosity for quick application.
- Long-lasting protection: Made with high-quality asphalt and leafing aluminum pigments.

Ideal for smooth-surface roofs where a bright, protective finish is desired.

## #758 ALUMINUM COATING 2 LB. FIBRATED

**Durable, reflective coating with added fiber strength.** Lucas #758 offers the same reflective benefits as #608, but includes reinforcing fibers for enhanced durability and adhesion. Perfect for older or rougher roof surfaces.

### Benefits:

- Enhanced strength: Fibers add durability and help bridge small surface gaps.
- Reflective protection: Reduces heat buildup and extends roof life.
- Smooth application: Quick even coverage with long-term performance.

Ideal for metal buildings, tanks, and asphalt roofs needing extra surface strength.

## #1015 ASPHALT BLEED BLOCKER

**Lucas #1015 Asphalt Bleed Blocker** is recommended as a bleed-blocking primer for Lucas reflective roof coatings over modified bitumen and asphalt bur. It can be used as an adhesion promoter on EPDM, PVC, Hypalon®, and structural concrete. Its light yellow color changes to a darker amber hue as the coating dries. This allows for visual confirmation of the coating's level of cure and readiness for application of the top coatings. #1015 is a polymer emulsion designed for use as a general purpose primer for silicone and acrylic systems. Also, for saturating and bonding polyester fabrics in fully reinforced acrylic elastomeric applications.

### Available Sizes

## #8015 TPO PRIMER

**Lucas #8015 TPO Primer** is an adhesion promoter intended to aid adhesion of 100% silicone, and hybrid polyurethane coatings and sealants to new and aged TPO roofing membranes.

This product is manufactured from a fast-evaporating solvent carrier and adhesive resins. A blue pigment is added to the standard product so that the applicator can better gauge application rates. For best results, apply #8015 as thin as possible with an adhesive roller.

## #315 KWIK-DRY ASPHALT PRIMER — PREMIUM

**Lucas #315 Asphalt Primer** is a fast drying asphalt primer intended for use on metal, concrete, masonry, wood decks and parapet walls prior to application of asphalt built up or modified bitumen roofing systems. It should also be used before resurfacing weathered asphalt and granular surfaced modified bitumen roofs. #315 Asphalt Primer's improved drying time allows traffic on the primed surfaces sooner and allows faster application of the roof system.

#315 Asphalt Primer is manufactured from refined high softening-point asphalt, fast drying petroleum solvents and a special penetrating additive.

## #9600 ALL PURPOSE CONSTRUCTION SEALANT

**Strong, versatile, and built to perform anywhere.** Lucas #9600 is a premium, 100% solids moisture-cure urethane sealant made for sealing large joints, termination bars, and a variety of building materials. It adheres powerfully — even when applied to wet or underwater surfaces — and is safe for indoor or outdoor use.

Why choose Lucas #9600?

- All-weather performance: Apply dry, wet, or underwater with superior adhesion.
- Safe and clean: Low odor, solvent-free, and VOC compliant (<10 g/L).
- Versatile and durable: Bonds to metal, roof tile, concrete, masonry, wood, vinyl, PVC, EPDM, and silicone surfaces.
- Paintable finish: Can be painted after curing for a clean, finished look.

Available in seven colors for residential and commercial applications.

### JOINT AND TERMINATION

### WINDOWS

### CONCRETE

## WHY USE #9600

1. UV Stable
2. Non-Shrinking
3. Use Wet/Dry/Underwater
4. Solvent Free
5. Low VOC
6. Paintable in 24 Hours
7. Seals Cracks/Joints Above Grade and Below Grade
8. Adheres to Most Common Building Materials

## #9500 LIQUID FLASHING

**Seamless protection for flashing, seams, fasteners, and repairs. Lucas #9500 Liquid Flashing** is a one-part, hybrid polyurethane sealant designed to create watertight, flexible flashing systems. Ideal for sealing pitch pans, fasteners, and seams, it provides a smooth, non-sag application that resists running — even on vertical surfaces.

### Benefits:

- Long-lasting seal: Non-shrinking formula ensures permanent protection.
- Wide compatibility: Bonds to metal, foam, asphalt, PVC, EPDM, and more.
- Versatile use: Works with both Lucas acrylic and silicone coatings.
- Repair ready: Excellent for sealing hail-damaged polyurethane foam roofs.

For TPO roofs, use with Lucas #8015 TPO Primer for best adhesion.

## #407 POLYPAN® STRAIGHTS & #408 POLYPAN® CORNERS

Lucas #407 PolyPan® Straights and #408 PolyPan® Corners are used for sealing around penetrations on all low-slope roofs. #407 and #408 are designed to be configured in a variety of sizes to accommodate various penetrations.

Lucas #407 and #408 PolyPans® are constructed from a high strength polymer. Products can be configured into a variety of sizes. 48 and 16 per case.

You can use Lucas #9600 to attach your PolyPan® and Lucas #4500 or #9500 to fill.

## #6600 UNIVERSAL™ SEALANT

**The all-in-one sealant for nearly any roof.** Lucas #6600 Universal™ is a high-performance, thermoplastic elastomer sealant designed for versatility and long-term durability. It forms a tough, flexible bond on virtually any roofing surface and maintains a clean appearance — perfect for visible roof areas.

### Benefits:

- Multi-surface adhesion: Bonds to metal, shingles, asphalt, EPDM, TPO, PVC, concrete, and more.
- Flexible and strong: Expands and contracts with roof movement.
- Great appearance: Ideal for residential roofs where looks matter.
- Color options: Available in clear, black, white, and custom colors.

Perfect for sealing seams, flashings, and penetrations on all roof types.

### IDEAL FOR RESIDENTIAL ROOFING APPLICATIONS

## #6600 ULTRACLEAR™ SEALANT

**Crystal-clear protection that blends right in.** Lucas #6600UC Ultraclear™ offers all the durability and flexibility of our Universal™ Sealant in an optically clear formula. It's perfect for sealing joints, seams, and flashings where a transparent, clean look is important.

### Benefits:

- Invisible finish: Dries ultra-clear for a seamless appearance.
- Tough and flexible: Handles temperature changes and building movement.
- Wide compatibility: Bonds to nearly any roofing or construction surface.
- Professional look: Ideal for visible residential and architectural applications.

Available in Ultra Clear only — for strength that shows less but lasts longer.
